Where did the project idea originally come from? (maximum 100 words)

.....  
.....  
.....  
.....  
.....  
.....

**7. The objective(s) and the application of the project**

What is the main objective of the project? does the output provide a solution to a specific problem, technical or social? If yes, who is the direct beneficial of your project? Do you know about a direct need of the project's outcome in your country? Or in any other parts of the world? (maximum 150 words)

.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....

**8. Innovation / added value**

According to you, what is the added value in your project? Specify the innovative part of your project. e.g. the idea itself, the implementation technique? Is your project a continuation work of a previous project?

.....

.....

.....

.....

.....

.....

.....

.....

.....

**9. Teamwork**

How is the work divided among the team members? Mention the specific task(s) executed by each of the team members. Please give few words to describe the background of each person. (As the project’s evaluation is anonymous, please do not mention names in this section. You can use person A, person B, etc.).

.....

.....

.....

.....

.....

.....

.....

.....

.....

### 10. Work methodology

How did you work towards achieving the desired output? Specify the steps. For example: first designing then followed by implementation. You may add a scheme (figure) of the workflow. Maximum size 300 KB). What are the tools you used? E.g. software tools? Hardware tools? Tell us about the specific tool(s) you used for each of the steps. (maximum 400 words)
